2	We must ask Suki. All I know is that those fridges are so antiquated (?) and LOUD. I don't see how she is able to keep her happy kind disposition amid that ruckus. She should wear earplugs! Perhaps a new fridge/freezer set up would be more quiet, and efficient too!	6/9/2014 7:51 AM

1	This building should be replaced	6/9/2014 1:47 PM
2	See custodial area above re: closets. Though we love our Quesada, this is currently a room from the dark ages! If we are dreaming, I would choose a sprung wood floor, with radiant heat from solar power. Great acoustic design and light board from this century. Multi-purpose sounds like PE, therefore we need a gym!!!	6/9/2014 7:51 AM
3	Not big enough...a wood floor would help with acoustics, comfort, physical health.....	6/8/2014 8:58 PM
4	This building is outdated in terms of it's fuctionality. Far too many items are stored inside this limited space which compromises safety of students. Not appropriate for a physical education class. Ceilngs and lights are too low. Floor is concrete and not very forgiving should anyone fall. Piano, tables and chairs can be easily bumped into. On the average the floor is vacumed and /or mopped only once a week.	6/8/2014 2:42 PM
5	This is a thoroughly unpleasant space. Almost no natural lighting, too small to allow for a basketball court or permanent seating, mats for floor seating are difficult to access and put away - etc. etc.	5/21/2014 1:28 PM
6	Carlos should have a more suitable office area. He should have more suitable lighting for his desk and a phone. Custodian should have a more efficient storage space on each campus	5/14/2014 12:44 PM

1	THE ALARM SYSTEM IS INAPPROPRIATE AND DANGEROUS. Every time we have a fire drill, disaster drill, and the likes, we all experience hearing damage. This is not okay. We work hard to nurture healthy, productive practices for our school community and this is plain destructive. Some higher up in Washington or Sacto made some standard that is inhumane. We MUST change this. It is horrible and no parents would EVER support the level of volume and shrillness of this alarm emission, nor proximity to little and big ears alike. It's one thing to notify us that we need to get safe; it's another thing altogether to destroy one of our precious senses.	6/9/2014 8:30 AM

2	smartboards can be so dumb. I can't even see the writing on the board in Willow's room: it is so hazy and dim. To read it I guess you'd have to close all the shades but that is impractical to do all day. Up and down etc. It's not healthy to have students spend their day in a dark shade-down room, so I'm glad she does not keep shades down.. Why would this be called 'smart'? You can't even read it from halfway back! It's simply ridiculous, and the name is ironic!	6/9/2014 8:30 AM

1	As stated in numerous prior surveys: Sprung wood floor is optimum for music/dance space. Cork floor is wonderful so, to be clear, no complaints at all! But if we're talking best practice etc..... There was awareness that the 5th grade classroom (Lynn's room) would be the only structure with the capability for a sprung wood floor due to the space under the floor.	6/9/2014 8:54 AM
2	Flooring is extremely painful to sit on...for adults as well as kids...hard, scratchy, unyielding, hard, scratchy, PAINFUL!!! Was I clear enough? Is there such a thing as enough storage?	6/8/2014 9:09 PM

7	outside fountain is no good	5/15/2014 11:57 AM
8	6. The windows need to be upgraded...they tilt diagonally and are difficult to close. The blinds also do not work. 7. It would be helpful to have a storage closet for tall teaching materials, and additional storage cabinets. As is, the teaching materials get very dusty and full of cobwebs being on the open shelves. 10. I am hoping to get a printer in the classroom for next year...after that I have no technology complaints. 12. There is very little display space for student work, but having windows is really wonderful. 13. When the drinking fountain was last upgraded, something happened to the water pressure. The fountain squirts way out on the counter if a student presses hard.	5/14/2014 12:27 PM

1	Play surfaces are inadequate...not sure that the woos chips work.	6/9/2014 1:56 PM
2	See initial comment regarding field maintenance hours. VB net should remain up, as at other schools. Having to put net up each time is prohibitive. Let's trust our community. Perhaps we can put up a sign for appropriate behavior around vb net. Too much PE stuff has nowhere to be stored so it's left against walls everywhere.	6/9/2014 8:54 AM
3	Need level asphalt area for basketball and 4-square.	6/8/2014 9:09 PM
4	Safety and liability concerns should dictate we have pads under chin-up bars that some children hang and perch on. Swing set is old and should for up to six people. Perimeter of BB and VB courts are cracking and separating. Soccer goals should be on wheels and not permanently anchored to ground. Green plywood wall should not butt up against fence. Leads to having balls frequently ending up over fence or getting lost. Same with 4 Square area where balls frequently end up on top of the roof.	6/8/2014 2:57 PM

2	Great facility. May not be as energy efficient as it could be because of all the free standing buildings.	6/9/2014 2:57 PM
3	Works really well! We need more robust garden and outdoor soft play areas. The whole trajectory should be towards keeping students in the outdoors as much as possible, not robbing them of this powerful learning 'tool' by too much sedentary desk time. Research shows that when students practice being in context with the earth and natural systems, all learning can happen more efficiently with less distraction.	6/9/2014 9:25 AM
